

EXPERIENCE

User Experience/Visual Designer, Microsoft HealthVault (www.healthvault.com)

January 2010 - Present

Ensure consistent and high-quality design for HealthVault.com. Build functional prototypes for usability studies and user research. Translate feature requests from project managers into functional requirements - including information architecture, user experience and visual design, styleguide implementation and management.

Graphic Designer, Real Networks, Inc.

September 2008 - August 2009

Design for in-house marketing and advertising. Worked closely with consumer marketing team to create online campaigns, landing pages, print media, direct mail and website design for consumer e-commerce products and services such as SuperPass, Rhapsody and RealPlayer SP.

User Experience Designer, RIPL Corp. (www.ripl.com)

June 2007 - September 2008

Design user interactions and flesh out various use-case scenarios. Collaborate closely with information architects and in-house market researchers in establishing a consistent visual style and seamless user experience for the web, software application for PC/Mac and mobile environment. Preparation of assets to development, including graphics implementation and styleguide.

Graphic Designer, The Service Board

September 2006 - June 2007

Worked closely with lead designer in web design and content management. Responsible for site redesign, including graphic design and front-end web development. Maintained consistent and cohesive brand to be used throughout the website and various print collateral including stickers, T-shirts, flyers and posters.

Freelance Creative Director, The Kore Ionz

February 2007 - June 2007

Logo concept and design for use in branding. Designed album artwork and layout for CD insert, stationary, website and various promotion material including T-shirts, stickers, promotional flyers and press kit.

Freelance Web Designer, Massline Media

June 2007 - September 2007

Completed redesign of website including e-commerce, blog layout and interaction design. Implemented Flash image gallery and worked very close with front and back-end web developers.
